Regions 3

Regions

In the menu *System > Master Data > Regions* you get a table with the regions of the related countries.

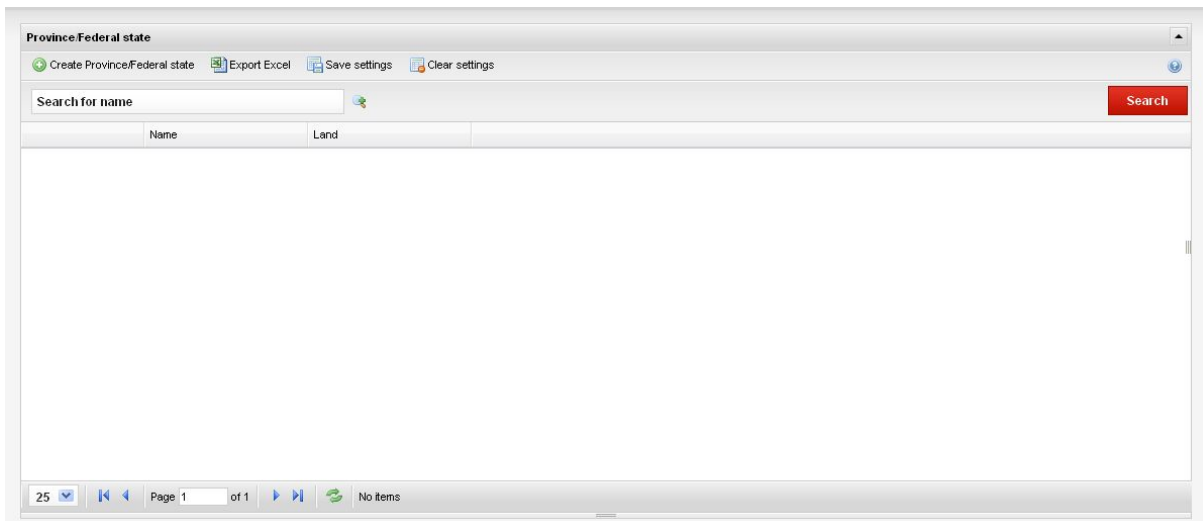

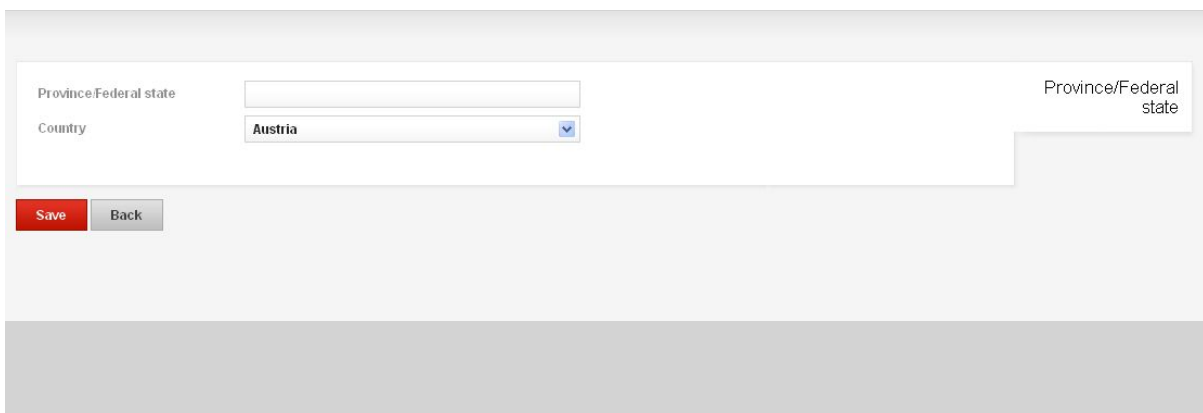

Table of regions

You can create a new region with the button: *Create Province/Federal state*.

Form to configure regions

With the button *Save* you create a new region, with the button: *Back* you get back to the list of all regions.

With the button: *Export excel* you can start the export of the list of activated regions .

You can choose in the dialog to view or to save the list in the system. In the second case you will be asked for the path of the target folder.

Yet you have another question leave it on this site for the metamagix-support-team.
