Consistency Check 3

Consistency Check

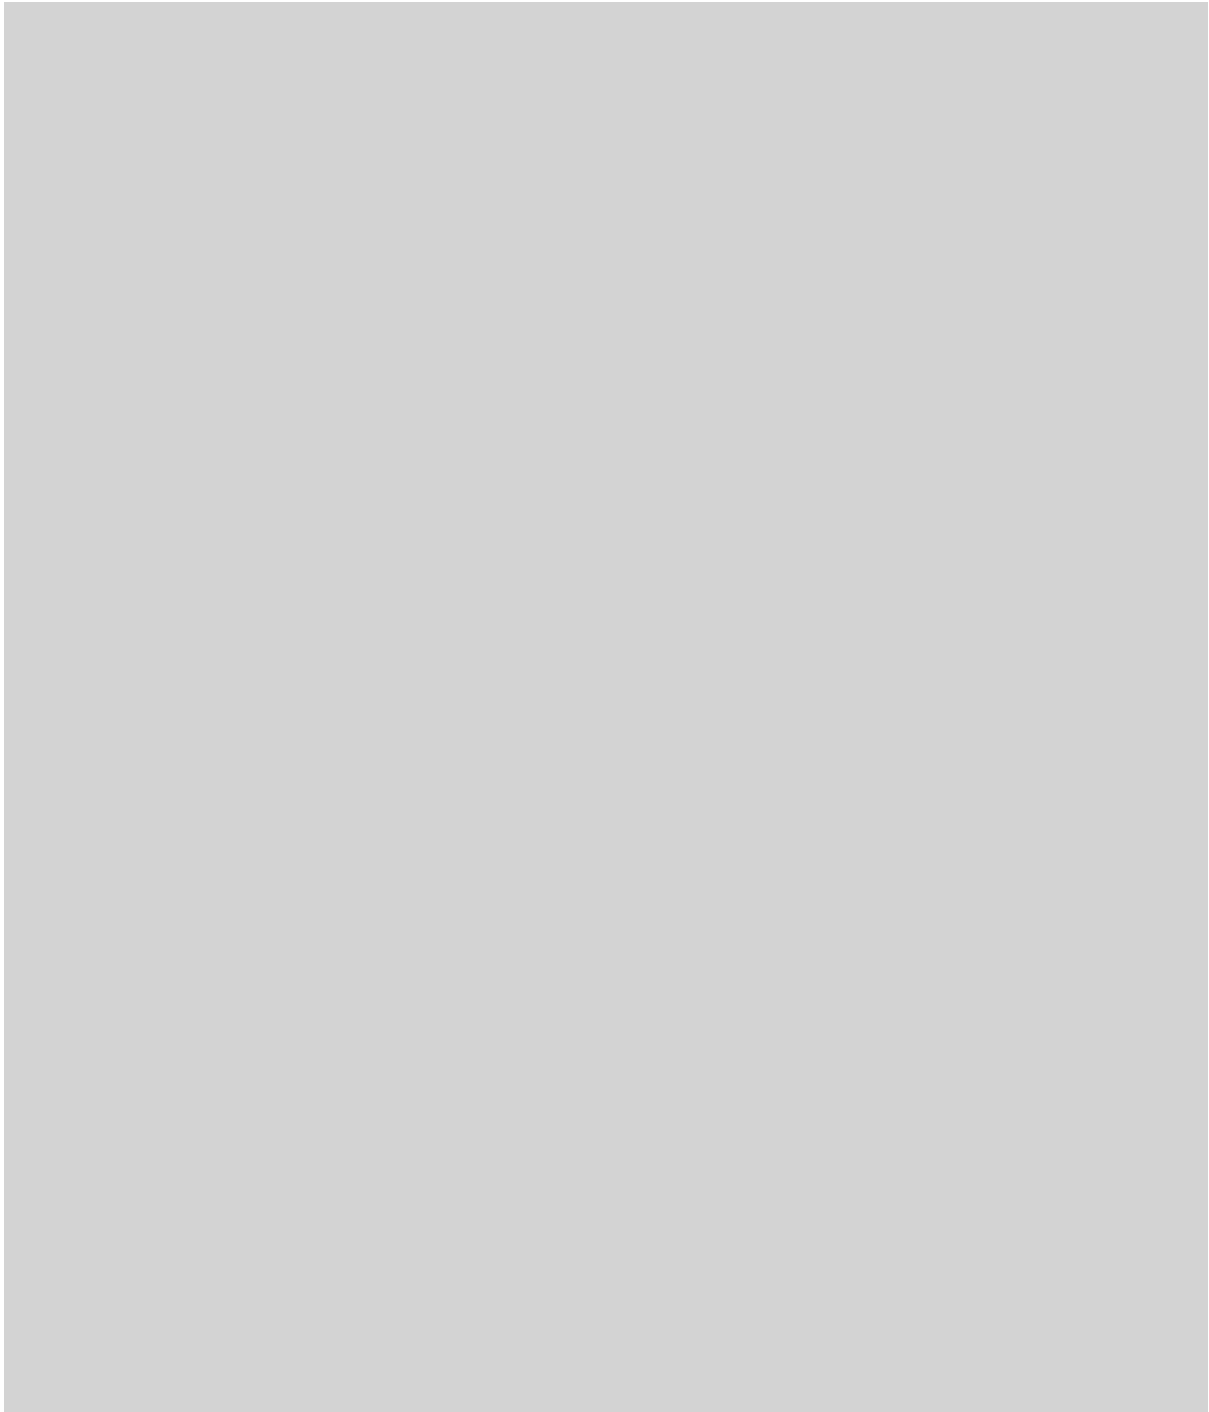

Go in the menu to *Portfolio > Consistency Check* to test your real estate portfolio. Possible state announcements on the level of objects or units are:

Object exists n-times,

Unit exists n-times,

no company attached to,

no business area dedicated

Consistency Ccheck.

Click on the object respectively the unit to get a detailed view on them and edit the data.

Troubleshooting

Example:

Problem: An object exist after the consistency check several times, but in the real estate list ther's just a single entry.

Solution: Maybe the object was bought once with a status and was saved in an other state. Alter the advanced query in the Flexigrid according to show miscellaneous states.

Yet you have another Question leave it on this Site for the metamagix-Support-Team.
