Graphical Factsheet Sell .....	3
--------------------------------	---

## Graphical Factsheet Sell

To take account of the different interests on the stock, sale or rent you can arrange in the menu *Reporting > Standard > Graphical Factsheet Sell* a query of selected objects of different criteria.

It is advisable to choose the option: *Export in the background* when you have long reports, complex calculations or when your system uses a VPN or goes through a Firewall.

With the button: *Query* you start the report, during this you can see on the top right of your screen a message that the engine works on the report. Additionally you can choose the option: *Notification with E-Mail* (if not you just see on the top right a small popup, with the announcement of the generating report). In this case you have to configure in an E-Mail address. For security reasons the compiled tables will remain for by default one month in the system.

With the button: *Back* you can remove all filter fields in one step.

Graphical factsheet sell

With the button *query* you start the report and when finished you get an Excel-Map with an address on each sheet.
