Portfolio Deltas .....	3
------------------------	---

## Portfolio Deltas

With the menu *Reporting > Standard > Portfolio Deltas* you can arrange all bought and sold objects of an chosen period on different limitations.

With the button: *Query* you get a result in table style. It is advisable to choose the option: *Export in the background* when you have long reports, complex calculations or when your system uses a VPN or goes through a firewall.

With the button: *Query* you start the report, during this you can see on the top right of your screen a message that the engine works on the report. Additional you can choose the option: *Notification with e-mail* (if not you just see on the top right a small popup, with the announcement of the generating report). In this case you have to configure in an e-mail address. For security reasons the compiled tables will remain for by default one month in the system.

With the button: *Back* you get a form which you need to limit query-filters or reset the fields on a default value.

Portfolio deltas

With the button: *Query* you get as the result an output of all bought and sold objects of the desired period.

**Yet you have another question leave it on this site for the metamagix-support-team.**
