Real Estate Access	3
--------------------------	---

Real Estate Access

This is an extended user management allowing object related access rights. A hierarchical group management as well as access templates, that is free definably groups of permissions, allowing quick access of complex permissions of new users. Furthermore included is journaling of security relevant activity and extended logging for simple system audits. Moreover you can define fields on central data objects to log modifications.

In the menu *System > Access Control > Real Estate Access* you can assign permissions to single objects.

Form to set object permissions

1. Click on the button: *List objects* to get a table with the desired objects and their permissions.
2. Mark the checkboxes of the object-lines which you want to give the same permissions.
3. Define the read- and write-access of the appropriate group
4. Click on the button: *Save* to make the modifications ultimate.

The top of the object list

Yet you have another question leave it on this site for the metamagix-support-team.
